

I would like to nominate Buckley Heating and Cooling for the Breathe Easy award. Buckley Heating & Cooling is a family owned business in South Kingstown RI, for nearly 100 years.

Buckley has five Ford E250P service vans and two Freightliner SG2 bobtail delivery trucks in its delivery fleet running on propane autogas, and he said the company plans to continue that trend. Since January of 2014, Buckley Heating and Cooling has used over 15,000 gallons of propane autogas. Buckley Heating and Cooling is the leader for propane autogas technology in Rhode Island. Not only does the company use the technology, they have made a concerted effort to conduct outreach about its emission and economic benefits.

He is leading by example for other private fleets in Rhode Island, as well as public fleets, such as state, municipal, and school districts.

Nominee Information

Buckley Heating and Cooling (Matt Buckley)
1632 Kingstown Rd, Wakefield, RI 02879
